- Lecture 11. Health-care buildings (author: Z.Schrammel)

## Introduction

Key-word notes have been prepared for architect students of Budapest Technical University in English to summarise information of given lectures.

Our basis for public building design methodology, the function of public buildings and technical requirements, achieved via a knowledge of architectural history and precedent of type. The course pattern analyses important examples of Hungarian and international public buildings regarding architectural space, architectural form, the use of materials and structures, in relationship to various environmental factors.
