

DESIGN METHODOLOGY

Course leader: *Prof. Mihály BALÁZS DLA*

Lecturer: Zoltan SCHRAMMEL DLA

Design Methodology deals with theoretical and practical methodology of architectural design flow. The point of theoretical Design Methodology is the design itself as a process mocked up. The process of architectural design thus can be compared to an informatics system, so for making the methodic more clear. Practical Design Methodology is closely connected to the Public Building Design 2 process itself, extending it with special design factors and details. Through analysing existing buildings and fictional situations interesting practical problems and solutions can be discussed. With the help of invited practicing architects, special methods of new facilities and building-reconstructions are presented, along with the design of technologically or structurally determined buildings. Because of its importance, sustainability, free access and ecological design will be touched along whole study.
