

ÉRZEKSZERVEK

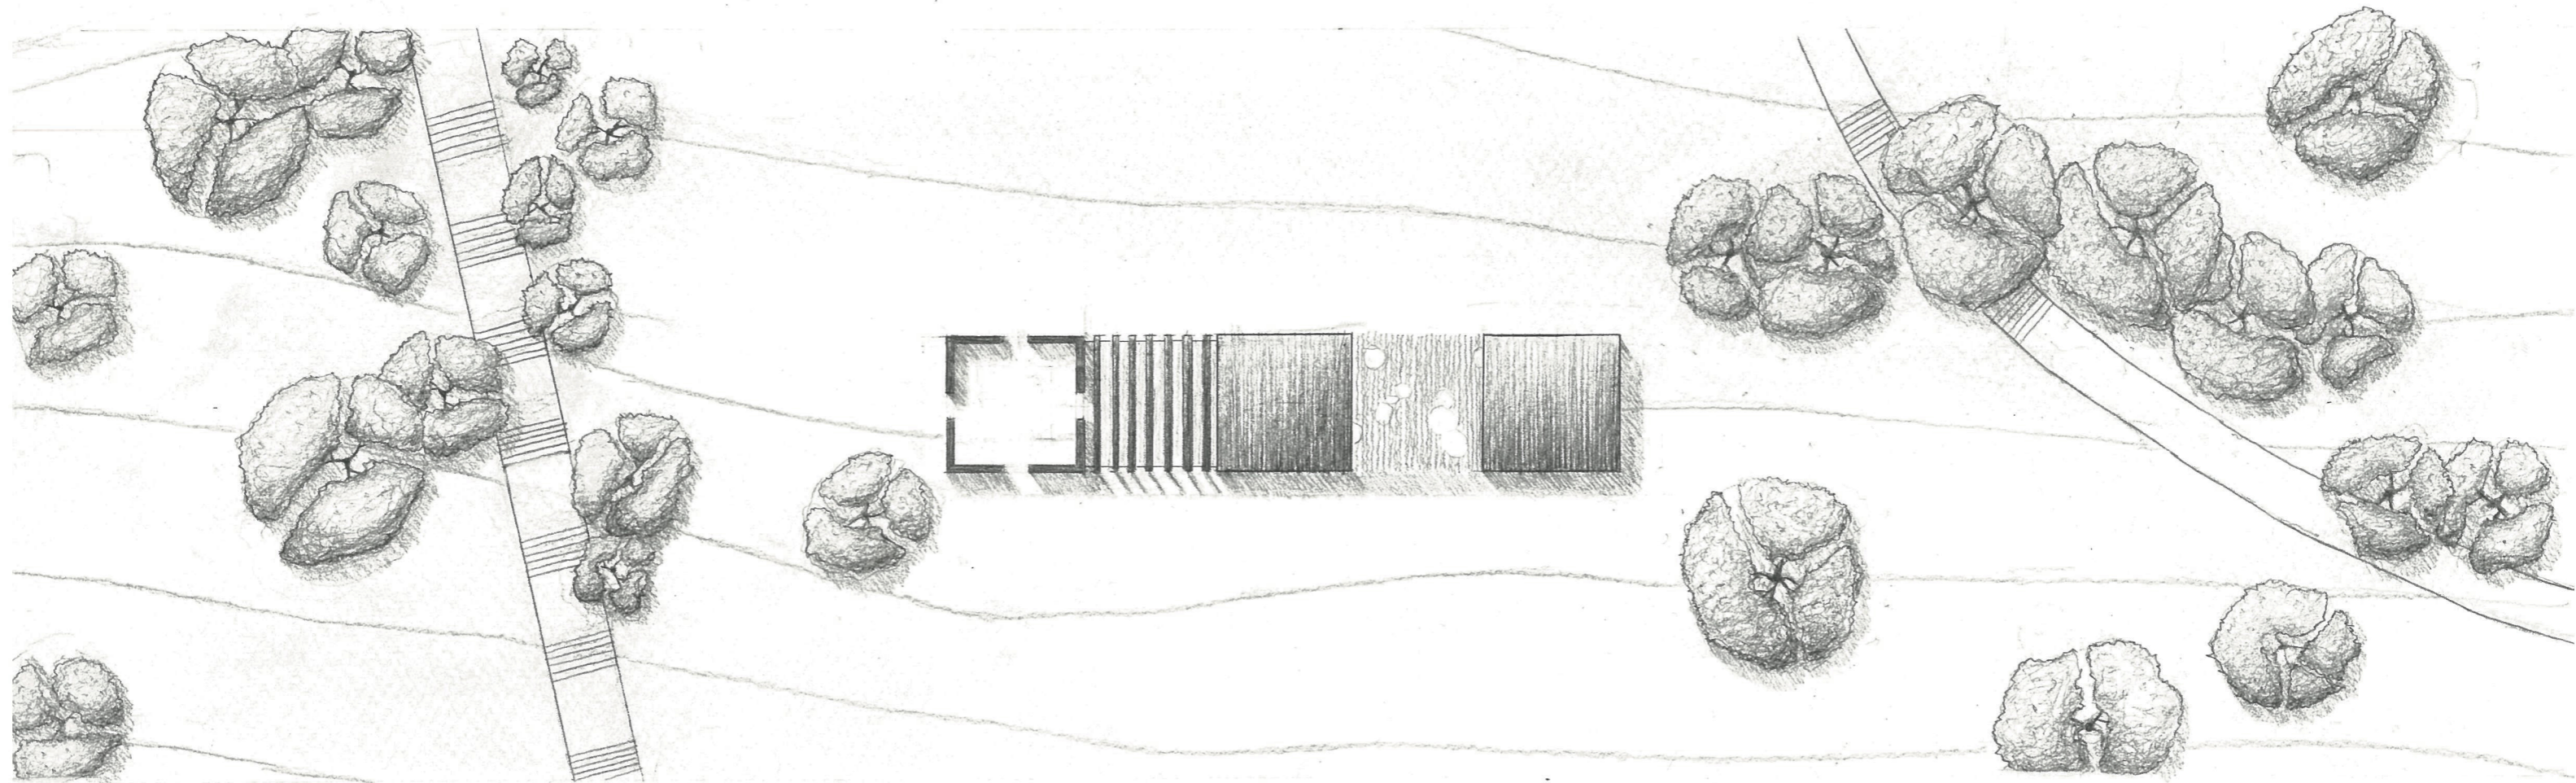

[er-zek-szerv] főnév

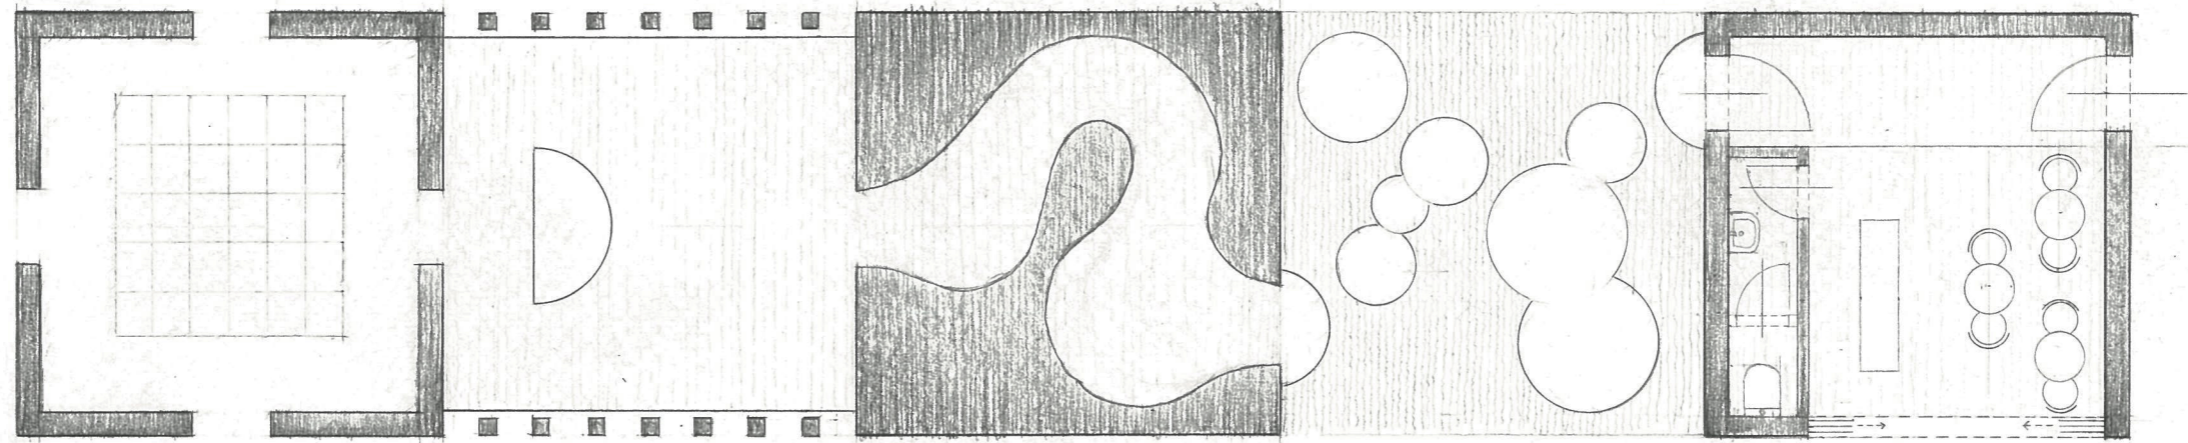

Érzékszerv az információfelvételre szolgáló szerv. Az ingerfelvevő képességű, az ingereket elektromos impulzusokká alakítva az idegszálakon keresztül az agyba továbbítja.

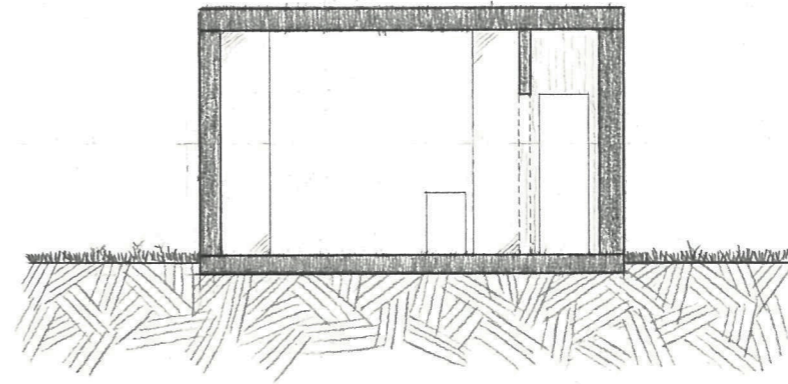

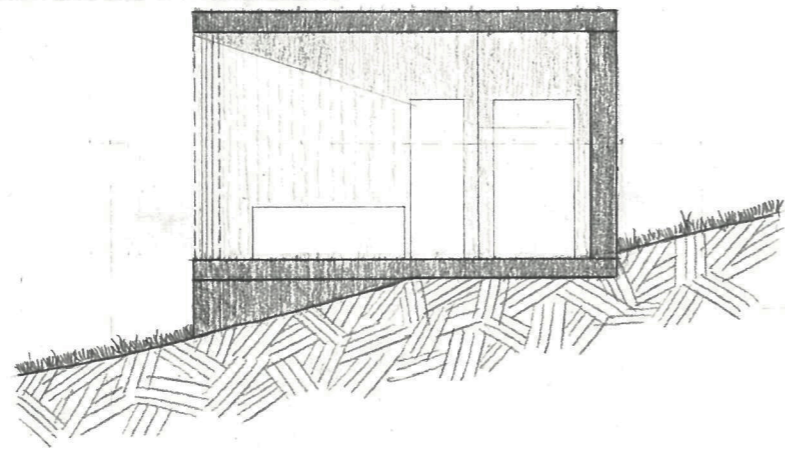

A terv ezeknek az érzékszerveknek a kielégítése' re készült, legyen szó egy egzotikus kávé ízvilágának feltárásáról, egy dús virágoskert illatának felfedezéséről, esetleg egy kiállítás megtekintéséről, nyugtató dallam hallgatásáról, vagy egy szümmunkra teljesen új felület tapintásáról.
